EDUCATION

Hunter College

New York, NY

Bachelor of Arts in Computer Science, Minor in Mathematics

May 2026

Relevant Coursework: Data Structures and Algorithms, Software Engineering, Full Stack Web Development, Digital Product Management, iOS Development, Applied Statistics

Honors: Daedalus Scholar

Georgia Institute of Technology

Online

Master of Science in Analytics Candidate

Expected May 2028

Specialization: Data Science

SKILLS

Languages: Java, Python, C++, JavaScript, TypeScript, SQL, Swift, R

Frontend: React, Next.js, HTML, CSS, Tailwind CSS, Vue.js

Backend: Node.js, Express, REST APIs, Firebase

Databases: PostgreSQL, MongoDB

Tools: Git, GitHub, AWS EC2, Vercel, Figma, Postman

Office Technologies: Office 365, Google Workspace

Spoken Languages: English (Native), Spanish (professional working proficiency)

RELEVANT EXPERIENCE

Trance4mation Games, Co-Lead Software Engineering Intern

September 2025 - May 2026

- Built and maintained a web application using TypeScript, Next.js, React, and Tailwind CSS, ensuring responsive UI/UX design and scalable front-end architecture.
- Integrated and optimized Phaser 3 in Next.js, building interactive 2D card-game mechanics and improving startup performance by removing a duplicate engine import.
- Implemented Firebase Authentication, enabling secure user sign-in, registration, and persistent session management across the platform.
- Tested frontend features, authentication flows, and game functionality through manual QA, debugging, and iterative code reviews prior to deployment.
- Co-led a team of four interns, setting weekly development goals, running check-ins, and ensuring smooth collaboration and accountability.
- Collaborated using GitHub, managing feature branches and contributing to clean, maintainable code through reviews and version control best practices.

Google Mentorship Program, Software Engineering Mentee

December 2023 - January 2024

- Selected for a competitive Google mentorship program.
- Collaborated with a 4-person team under guidance from a Google software engineer.
- Presented our application to fellow mentees and other Google software engineers.

PROJECTS

Healthcare Database Management System

June 2026

- Designed and implemented a relational healthcare database containing 500+ mock patient records across 6 interconnected tables for patients, providers, visits, diagnoses, prescriptions, and visit records.
- Enforced referential integrity and normalized database structures to maintain data consistency across patient and clinical records.
- Developed SQL queries, forms, and reports to support patient lookup, visit tracking, diagnosis management, and healthcare reporting workflows.
- Designed relationships, primary keys, foreign keys, and validation rules to model real-world healthcare workflows while maintaining data integrity.

Crossword Puzzle Generator | [GitHub](#) | [Live Demo](#)

May 2026

- Built a full-stack web application that generates randomized crossword puzzles from AI-generated clues and definitions.
- Integrated OpenAI's GPT API to dynamically generate crossword terms, clues, and definitions, enabling scalable AI-powered content generation.
- Developed an algorithm to place words into crossword grids while maximizing valid intersections and puzzle completion rates.
- Implemented responsive front-end components using HTML, CSS, and JavaScript to support interactive puzzle solving across desktop and mobile devices.
- Utilized Git for version control and iterative development, enabling rapid feature enhancements and deployment.
- Deployed and hosted the application on Vercel, managing server configuration, application deployment, and updates.

FinGoal | [GitHub](#)

September 2025 - December 2025

- Collaborated with a team of three to design and build a full-stack financial goal-tracking application using React, Node.js, and Express.
- Developed and consumed RESTful APIs to support user authentication, savings goals, friend connections, and progress comparisons.
- Integrated backend services with MongoDB to persist users, financial goals, categorized transactions, and goal contributions, including individual goals and shared goals between users.
- Troubleshoot front-end UI issues and API errors to improve performance and user experience.
- Managed team-based version control with GitHub and deployed the frontend on Vercel.

EventFinder | [GitHub](#)

October 2025 - December 2025

- Developed a Swift-based iOS app for searching concerts and sports events using the Ticketmaster API.
- Implemented deep linking, custom animations, and a Settings view with persistent user preferences using AppStorage.
- Integrated EventKit to create and manage native Calendar events, persisting EKEvent identifiers in SwiftData to maintain synchronization between in-app schedules and the device's system Calendar.
- Integrated networking functionality through URLSession to fetch and decode live JSON data from REST APIs.

SUPPORTING EXPERIENCE

Khoda Productions, *Audio Engineer*

October 2023 - Present

- Completed recording, mixing, and mastering for recorded songs, sound effects, and more for studio clientele.
- Set up, troubleshoot and test microphones, musical instruments, recording software and other equipment.
- Operated control panels and facilitated recording sessions for musicians.

Five Iron Golf Grand Central, *Roamer/Bay Host*

April 2024 - April 2025

- Served guests and maintained operations in a fast-paced hospitality environment

Mathnasium, *Tutor*

October 2023 - December 2024

- Tutored elementary, middle, and high school students in mathematics, problem-solving, and homework completion.
