EXPERIENCE

NYC Department of Youth and Community Development, *Analytics Intern*

July 2026 - Present

- Queried and joined 5+ agency datasets using SQL to automate reporting and validate data quality.
- Developed Power BI dashboards with KPIs and drill-down visualizations to monitor program performance and operational trends.
- Cleaned, validated, and analyzed 100+ survey responses across 75+ survey fields in Excel to support agency research and reporting.

Trance4mation Games, *Co-Lead Software Engineering Intern*

September 2025 - May 2026

- Integrated and optimized Phaser 3 in Next.js, improving startup performance by 50% through engine optimization.
- Developed multiplayer systems, including game creation, lobby management, player synchronization, and seamless navigation.
- Built and shipped 10+ production features using Next.js, React, TypeScript, and Firebase, including authentication and real-time multiplayer functionality.
- Co-led a team of four engineering interns by setting sprint goals, leading 10+ team check-ins, reviewing 20+ GitHub pull requests, and coordinating feature delivery.

Google Mentorship Program, *Software Engineering Mentee*

December 2023 - January 2024

- Selected for Google's competitive Software Engineering Mentorship Program; collaborated on the design, development, and presentation of a full-stack music queue application with a four-person engineering team under the guidance of a Google Software Engineer.

PROJECTS

Crossword Puzzle Generator | [GitHub](#) | [Live Demo](#)

May 2026

- Developed a full-stack crossword generator using React, Node.js, Express, and the OpenAI API to create AI-generated terms, clues, and definitions.
- Designed a grid-placement algorithm that maximizes valid word intersections and puzzle completion.
- Built a responsive interface for desktop and mobile and deployed the application on Vercel.

FinGoal | [GitHub](#)

September 2025 - December 2025

- Built a financial tracking web application using React, Node.js, Express, MongoDB, and JWT Authentication.
- Developed 12 RESTful API endpoints for user authentication, savings goals, friend management, and shared goals.
- Built interactive Recharts dashboards to visualize savings progress and spending trends.

SKILLS

Languages: Java, Python, C++, SQL, JavaScript, TypeScript, Swift, R

Frontend: React, Next.js, HTML, CSS, Tailwind CSS, Vue.js

Backend: Node.js, Express, REST APIs

Databases: PostgreSQL, MongoDB, SQL Server

Cloud: Firebase (Authentication, Firestore), AWS EC2, Google Cloud Platform (GCP)

Tools: Git, GitHub, Postman, Vercel, VS Code, Figma

EDUCATION

Georgia Institute of Technology

Master of Science in Analytics (Part-Time)

Expected May 2028

Hunter College

Bachelor of Arts in Computer Science, Minor in Mathematics

New York, NY

May 2026

Honors: Daedalus Scholar
